fen (Advil, Motrin) line 12

Call 911

Or go to the emergency room if:

- You have chest pain or pressure line 36
- You are short of breath at rest or cannot lie flat line 37
- You cough up pink, frothy mucus line 38
- You faint line 39

Call your doctor

If:

- You gain more than 2 lbs in one day or 5 lbs in one week line 30
- Swelling in your legs, ankles or belly gets worse line 31
- You feel dizzy or lightheaded line 32
- You need more pillows than usual to sleep line 33

Appointments

WARNING SIGNS

Split into “call 911” and “call your doctor,” not buried at the bottom.

otrin) line 12

cist

a dose. These are questions to bring.

Check other labels too

in medicines contain ibuprofen or other
). Read the "Active ingredients" on anything

Appointments

Dates are counted from the day you went home. Call to confirm the exact time.

NOV 17 TUE

Cardiology clinic with Dr. Patel
In 1 week · call 555-0142 to schedule
line 15

NOV 17 TUE

Blood test (BMP)
In 1 week line 16

BY NOV 24 TUE

Primary care with Dr. Nguyen
Within 2 weeks line 17

For now

- Low sodium diet: less than 2,000 mg of sodium per day. line 20

APPOINTMENTS

“In 7 days” becomes a real date, ready to add to your calendar.

- **Acetaminophen** NEW · 2 tablets (500 mg) for mild pain, no more often than every 6 hours line 8

Ask your pharmacist

Take Home never changes a dose. These are questions to bring.

- **Two of your medicines contain acetaminophen**
  Oxycodone-acetaminophen (Percocet) and Acetaminophen (Tylenol) both contain acetaminophen (Tylenol). The FDA's limit for adults is 4,000 mg of acetaminophen a day from all medicines combined. Ask your pharmacist how much of each you can take in one day. line 7 line 8
- **Acetaminophen: no daily limit written**
  It says "as needed" but not how many you can take in a day. Ask how many is the most in 24 hours. line 8

docusate	a stool softener, often g opioid pain medicine
oxycodone	an opioid pain medicine
cephalexin	an antibiotic

Ask about your papers

With Claude and your own key (set it under "Use Claude" below). Claude answers only from your papers and has to quote the line it use

Can I take ibuprofen for a headache?

ASK YOUR PHARMACIST

Percocet and Tylenol both contain acetaminophen. Take Home never changes a dose. It writes the question.

How it's built

- Plain JavaScript on GitHub Pages. No server, no account: health information stays on the device.
- Rules read the papers: sections, medicine lines (status, strength, amount, frequency, limits), dates.
- Optional Claude features, each with a check that can reject what comes back. Claude never decides a dose or a time.
- 21 automated tests, including every AI guardrail.

Try it

- Live: adrian-erlikhman.github.io/take-home (press "Try a heart failure stay")
- Code: github.com/adrian-erlikhman/take-home
- Demo: youtu.be/SdFiaW_MIWU
- Adrian Erlikhman and Michael Tarekegn

The sample patients are made up. Take Home is not medical advice. In an emergency, call 911.
